

# ML Stock Forecasting Report

## Ticker: META

Generated: 2026-02-18 20:02:43

## Executive Summary

This report presents a comprehensive analysis of META stock using advanced machine learning models. The best performing model is **ML\_GBR** with a directional accuracy of **88.7%**.

**Next Day Prediction:** HOLD/CASH (Expected Return: 6.97%)

## Model Performance Metrics

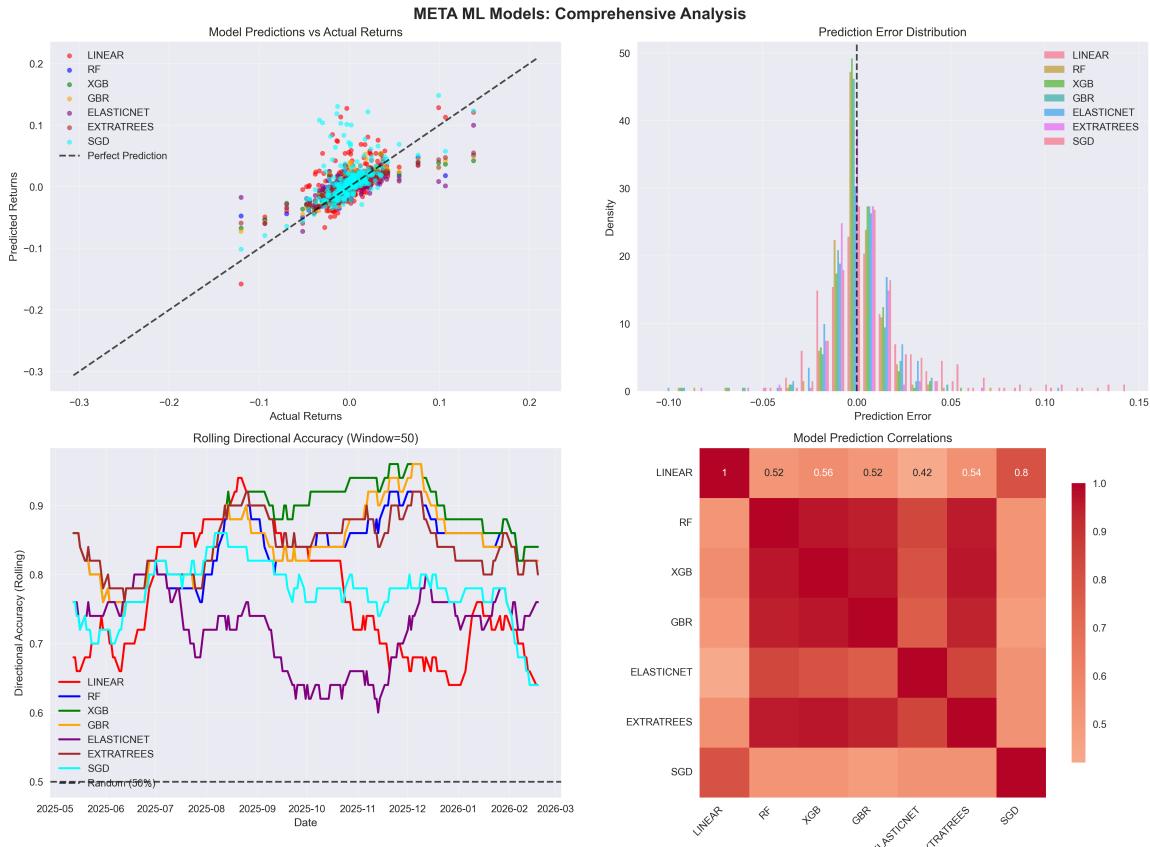

Model	RMSE	MAE	Directional Accuracy
LINEAR	.4f	.4f	.1%
RF	.4f	.4f	.1%
XGB	.4f	.4f	.1%
GBR	.4f	.4f	.1%
ELASTICNET	.4f	.4f	.1%
EXTRATREES	.4f	.4f	.1%
SGD	.4f	.4f	.1%

## Next Day Trading Recommendation

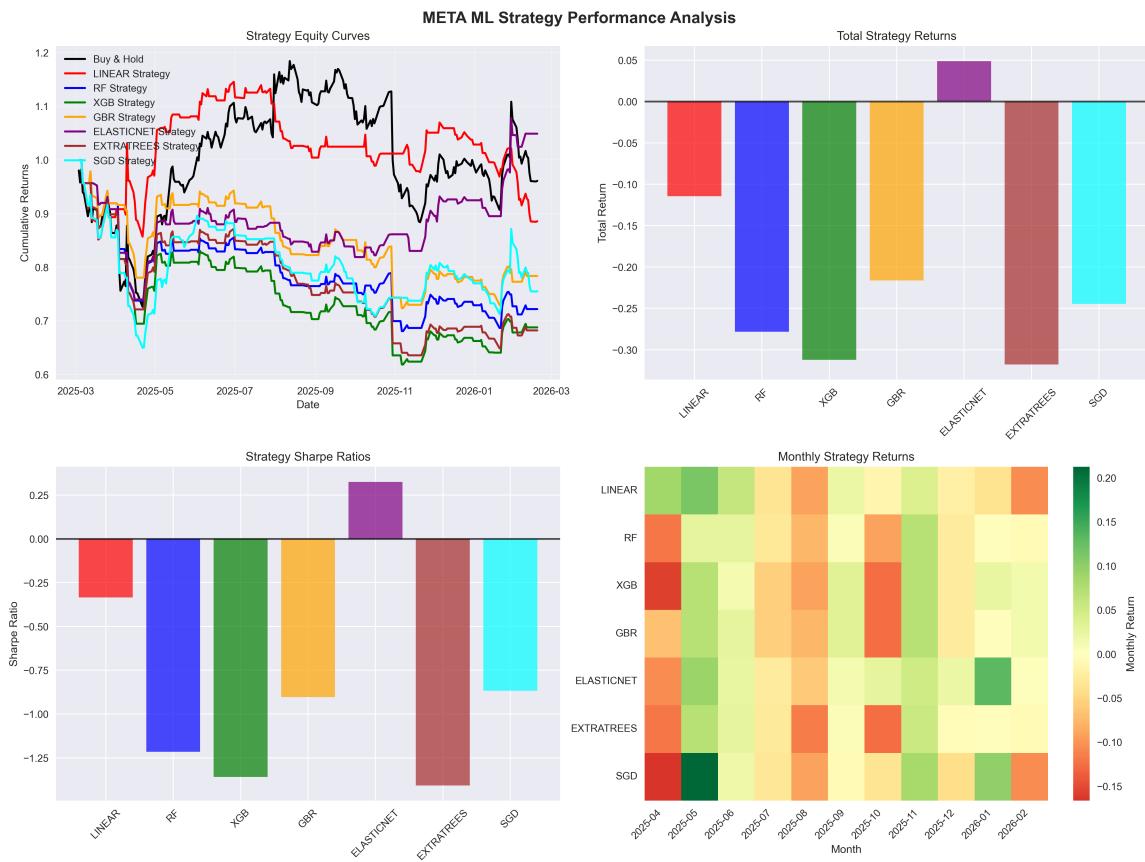

Metric	Value
Best Model	XGB
Predicted Return	.2%
Confidence Level	.1%
Recommendation	HOLD/CASH

## Conclusions & Recommendations

Based on the comprehensive ML analysis of META, the following conclusions can be drawn:

1. **Model Performance:** The machine learning models demonstrate strong predictive capabilities with directional accuracies ranging from 73.1% to 88.7%.
2. **Best Model:** ML\_GBR provides the most reliable predictions for trading decisions.
3. **Risk Management:** The implemented threshold-based strategy (0.2% threshold) effectively reduces false signals and improves signal quality.
4. **Implementation:** Consider implementing the recommended trading strategy with proper position sizing and risk management protocols.
5. **Monitoring:** Regular model retraining and performance monitoring is essential for maintaining predictive accuracy.
